

**Deformation  
Characteristics of  
Geomaterials**

**Comportement des Sols  
et des Roches Tendres**

Edited by

H. Di Benedetto, T. Doanh

H. Geoffroy & C. Sauzéat

*Discussion Session 5:*

*Modelling (rheological, mathematical, mechanical models)*

*Modélisation (modèles rhéologiques, mathématiques, mécaniques)*

Neural network based prediction of silty sands behavior <i>S.S. Yasrobi &amp; M. Banimahd</i>	1003
Experimentation and modelling of unsaturated soils behaviour in non-isothermal conditions <i>F. Jamin, M.S. El Youssoufi &amp; C. Saix</i>	1009
An illustrative model for assessing the influence of elastic non-linearity on the residual behaviour of a platform subject to traffic loading <i>M. Abdelkrim &amp; P. de Buhan</i>	1019
Cyclic behaviour of soils, a prediction of permanent deformations <i>E. Vincens, Ph. Dubujet &amp; B. Cambou</i>	1027
Bifurcation analysis on soil specimens exhibiting diffuse deformation modes and localized slip planes <i>Y. Yamakawa, K. Ikeda, K. Terada &amp; K. Torii</i>	1035
Application of time-dependent model in tunnelling <i>A. Purwodihardjo &amp; B. Cambou</i>	1043
Simplified method based on plasticity for the permanent strains of unbound granular materials for flexible pavements <i>T. Habiballah, C. Chazallon &amp; C. Petit</i>	1051
Validation of an elastoplastic model to predict secant shear modulus of natural soils by experimental results <i>J.A. Santos, A. Gomes Correia, A. Modaressi, F. Lopez-Caballero &amp; R. Carrilho Gomes</i>	1057
Application of fractal dimensions to examine the frictional behavior of granular materials <i>Z.Y. Yang, T.J. Wu &amp; G.L. Yang</i>	1063
Discrete numerical simulation, quasistatic deformation and the origins of strain in granular materials <i>G. Combe &amp; J.-N. Roux</i>	1071
A thermomechanical model for clays <i>I. Einav &amp; A.M. Puzrin</i>	1079
Shear behavior of sand under cyclic loading in general stress systems <i>T. Nakai, M. Hinokio, Y. Korenaga &amp; H. Nagai</i>	1087
Numerical analysis on liquefaction-induced progressive deformation with a pore water migration <i>R. Uzuoka, N. Sento &amp; M. Kazama</i>	1095
A simple constitutive model of sand based on strain-path controlled tests <i>Y. Asaka, K. Tokimatsu, K. Iwasaki &amp; Y. Shamoto</i>	1103
Bounding surface formulation of a unified critical state model for clay and sand <i>H.S. Yu &amp; C.D. Khong</i>	1111
An elasto-plastic constitutive model at the overall strain ranges ( $10^{-4}$ to 10%) for weathered soils <i>S. Oh, G.-C. Kweon &amp; D.-S. Kim</i>	1119
New strain energy hardening functions for sand based on the double yielding concept <i>S.J.M. Yasin &amp; F. Tatsuoka</i>	1127
A framework for modelling of the time effects on the stress-strain behaviour of geomaterials <i>F. Tatsuoka, H. Di Benedetto &amp; T. Nishi</i>	1135
