FIT4RRI

Fostering Improved Training Tools for Responsible Research & Innovation

FIT4RRI Context & Impact

FIT4RRI identifies a **serious gap** between

The potential role **&** The actual limited impact

of

Responsible Research & Innovation **+** Open Science

on RFPOs
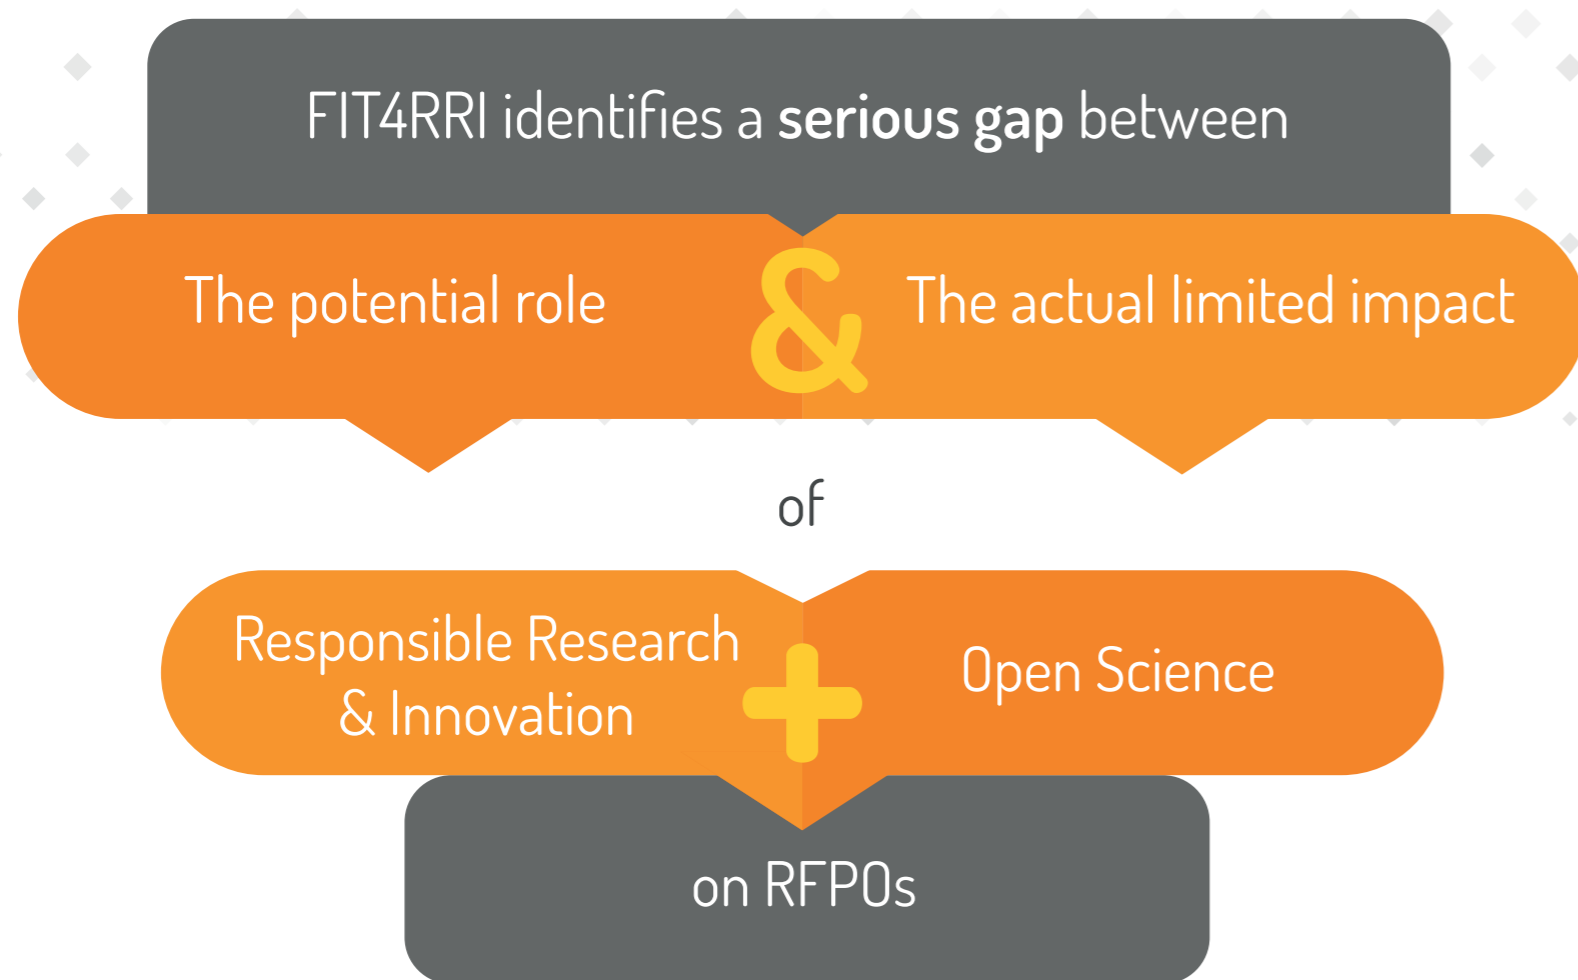

FIT4RRI Objectives

The project will act on 2 key factors to bridge the gap and activate institutional changes in Research Funding and Performing Organisations:

1 Training

Enhancing competencies and skills through an improvement of the training offer currently available in terms of training tools, actors and strategies.

2 Governance

Institutionally embed RRI and OS practices and approaches by promoting the diffusion of more advanced governance settings (organisational practices, tools, arrangements and culture).

FIT4RRI Activities & Outcomes

1 Understanding

Analysing general trends, barriers, drivers, interests, values & advanced experiences related to RRI & OS.

> Report on the literature review
> Report on the mapping & benchmarking exercise
> Report on the sectoral analysis
> Content map and meta-analysis of RRI/OS training

www.zenodo.org/communities/fit4rri/

2 Testing

4 co-creation experiments developed involving different RFPOs to test outputs and observe RRI & OS in action.

EXPERIMENT 1
focused on **Energy Efficiency**

EXPERIMENT 2
focused on **Photonics**

EXPERIMENT 3
focused on **Material Science**

EXPERIMENT 4
focused on **Text & Data Mining**

3 Promoting & Sharing

Development of practical **training tools** and events as well as evidence based guidelines on governance settings.

> Access videos, tutorials and guidelines.
> Check out the integrated RRI and OS taxonomy.
> Join the community and contribute new resources.
> Find the collection on the FOSTER portal.
