Travessa da Saudade, Pevidém, Guimarães, 2019

The Learning field concept

- The Pevidém Learning Field seeks to transform the space-time of children, acting in its material and immaterial dimensions, based on models of urban transformation, oriented towards children.
- The focus is on the child, but the actions mobilize children, families, teachers and social action of an interdisciplinary team (architects, social workers, psychologists, cultural agents, health professionals).
- The rationale behind the project is based on the idea that the territory, as a common living space, can and should be educational, favoring learning and promoting citizenship and the well-being of children and families.
- Main actions include Intervention in public spaces, training programs for local agents, child social participation and initiatives to promote children's rights.

Our Learning Field: Pevidém

Pevidém as a Learning Field, Guimarães

- Guimarães Region, which corresponds to the parishes of the Pevidém Group of Schools, with a total of 15,453 people (Census 2021).
- This territory has been affected by every crisis in the textile industry, with cyclical unemployment, high emigration and precarious working conditions.
- Threats to the quality of the family environment, school performance and children's development and well-being.

Approach based on the *Learning Field* inside the community, promoting social participation and improving leisure and cultural life, focuesed on the child

0 to 3 years old

6 to 10 years old

6 to 16 years old

Development& Education in Daycare

Improvement of educational practices and support in children's development in daycare contexts

Learning is a +

(Inês Guedes de Oliveira, Teresa Freire, Gabriela Bento, Gabriela Trevisan, Mariana Carvalho)

Promoting non formal education and transformation of school spaces

Participação social

Desenvolvimento e Educação

Territory Mapping

• "For children, the right to the city is the condition of their own citizenship. This does not constitute a legal proclamation nor is it a granted statute. It is, moreover, something that results directly from public policies for children and for the city, which guarantee the participation of children and adults in the construction of the urban territory according to logics of inclusion and sustainability" (Sarmento, 2019, p. 16)

Survey to the residentes of Bairro de Gondar

What do we need in the exterior space of my neighbourhood?

Fewer holes in the pavement and a bicycle enclosure

park to play

Covered bus stops

Grill

Larger space for study and activities

Space for adults

Better conditions in banks, with roof

Park to play

Covered bus stop

Improve pavement

Spaces for adults

What I would like to improve in my neighbourhood?

Parking

Children's playground, soccer field, parks for socializing

Improve children's playground

Buildings, park, countryside, leisure spaces

Apartments, pollution and public spaces

Having ground in the park, not sand

Playground

Soccer field

Public/leisure space

Parking

Pollution

Survey to the residents of Bairro de Gondar

If I could choose...

1st (40) Leisure/living space sheltered from the rain/sun

2nd (37) Bus stop

3rd (36) Space for sports activities

4th (33) Play space

5th (31) Laundry / clothes drying

6th (30) Study/training space for children and young people

6th (30) Space for cultural initiatives

7th (28) Community Barbecue Grills

7th (28) Space for creative workshops

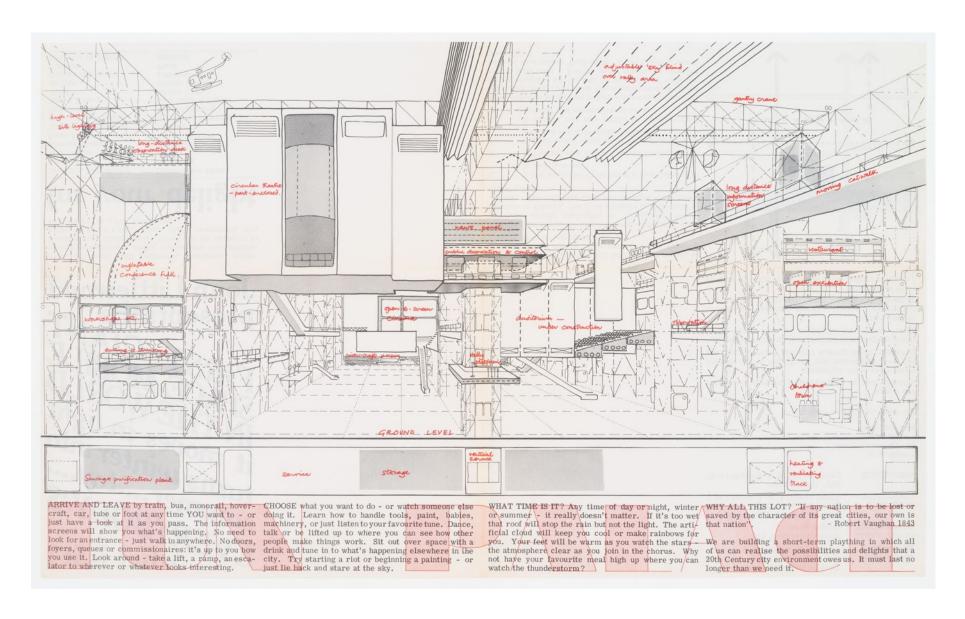

7th (28) Space that can be used for various activities such as: parties, gatherings, meetings

8th (27) Bicycle Park

9th (26) Space for rehearsals

10th (25) Storage

11th (21) Community kitchen

Main goal and justification

Respond to the needs identified by residents and institutions in the neighborhood in the preliminary diagnosis, filling the absence of collective public spaces, namely covered spaces that can house different groups and host various activities that promote healthier lives, through the co-construction of the Palácio da Imaginação (Imagination Palace), as a multifunctional community space.

Methodology (4 verbs-actions that achieve the objectives of the IP)

interdialogue (the space between the "I" and the "other");

inhabit (my neighborhood, play, study, food, health, fabric);

recreate (the study, the wall, the floor, the ceiling, the dialogue),

activate (universal prevention, well-being, exchange, the environment, the sky), materialized in the inter-action

of the "Me" in the "We"
